

Muhammad Absar

Shadman Town 14-B, Karachi
(+92) 3182667926
absar.haque2003@gmail.com

Backend Developer with proven experience in building scalable, high-performance server-side applications using Node.js, Express.js, NestJS, and Java (Spring Boot). Skilled in designing RESTful APIs, implementing JWT-based authentication, and managing data with MongoDB, PostgreSQL, and MySQL. Experienced in optimizing database performance using Redis and leveraging ORMs like Prisma and Sequelize. Committed to writing clean, maintainable code and delivering robust backend solutions.

EDUCATION

University of Karachi
Bachelor's in Computer Science
(waiting for degree)

Karachi, Pakistan
2022- 2025

TECHNICAL SKILLS

- **Backend:** Node.js, Express.js, NestJS, Java, Spring Boot.
- **Frontend:** HTML, CSS, JavaScript, React.js, Bootstrap, Tailwind.
- **Databases & ORM:** MongoDB, MySQL, PostgreSQL, Prisma, Sequelize.
- **Caching & Tools:** Redis, Git, GitHub.
- **Soft Skills:** Critical Thinking, Problem Solving, Agile, Research and Analysis.

PROFESSIONAL EXPERIENCE

❖ **Freelance Backend Developer — Remote / Pakistan** (June 2024 – May 2025)

- Developed RESTful APIs using Node.js, Express.js, and NestJS for multiple client projects.
- Designed and optimized MongoDB, MySQL, and PostgreSQL databases.
- Implemented JWT-based authentication and authorization.
- Integrated third-party services including Stripe payment gateway and email services.
- Improved backend performance through query optimization and Redis caching.
- Worked directly with clients to gather requirements and deliver production-ready

❖ **Code Avenue – Karachi, Pakistan** (May 2025 – Present)

- Developed and maintained RESTful APIs using Node.js and Express.js for production-level web applications.
- Designed and managed databases using MongoDB, MySQL, and PostgreSQL, ensuring efficient data storage and retrieval.
- Implemented JWT-based authentication and authorization to secure application endpoints and user access.
- Collaborated with cross-functional teams on multiple projects to ensure seamless backend–frontend integration.
- Independently designed and developed complete backend systems, including admin panels, for multiple applications from scratch.
- Integrated third-party services and APIs to support application functionality and business requirements.
- Optimized backend performance by improving query efficiency and following best practices for scalable API design.
- Used Git and GitHub for version control, following proper branching, code reviews, and collaboration workflows.

❖ INVENTORY MANAGEMENT SYSTEM

- **Architecture:** Engineered a high-concurrency Event-Driven System using Spring Boot 3 / Java 21 and Apache Kafka to decouple Order and Notification services.
- **Concurrency:** Resolved race conditions in inventory management by implementing Optimistic Locking, ensuring data integrity during peak traffic.
- **Real-time:** Integrated WebSockets with STOMP to push instant order status updates directly to live user dashboards.
- **Performance:** Optimized system throughput by leveraging Redis as a distributed cache and PostgreSQL for robust data persistence.
- **Security:** Secured the platform with a custom JWT-based filter, providing fine-grained access control for Admin and Mobile clients.

❖ RESTURANT APP

- **Frontend:** Built with **React.js** for a dynamic UI.
- **Backend:** Developed using **Express.js** for API management.
- **Database:** **MongoDB** for storing menus, orders, and customer data.
- **Features:** Real-time order management, customer login, and admin panel for managing orders and menu.
- **Authentication:** Implemented **JWT** for secure login.

❖ ONLINE LEARNING PLATFORM (LIKE UDEMY)

- **Backend:** Built using Express.js to manage RESTful APIs for courses, users, and enrolment logic.
- **Database:** MongoDB for course content and user data.
- **Features:** Student authentication, course enrolment, and admin panel.
- **Authentication:** JWT-based authentication.
- **Payment Integration:** Stripe payment gateway.

❖ REAL-TIME CHAT APPLICATION

- Built a real-time chat application using Node.js, Express, MongoDB, and Socket.IO.
- Implemented real-time messaging, user connection tracking, and chat history persistence.
- Frontend developed with React, Tailwind CSS, Zustand, and DaisyUI.
- GitHub: <https://github.com/Muhammad-Absar-ul-Haque/fullstack-Chat-App>

Github link: <https://github.com/Muhammad-Absar-ul-Haque/fullstack-Chat-App>

❖ FAST-REACT-PIZZA

Frontend Pizza Delivery App | React, Redux Toolkit, Tailwind CSS.

- Built a responsive pizza ordering frontend with **React** and **Tailwind CSS**.
- Managed cart and checkout flow using **Redux Toolkit**.
- Implemented **client-side routing** with **React Router DOM**.
- Followed best practices for **state management** and **component architecture**.
